**GZ-702HS COMPOUND**

**RichardsApex GZ-702HS CPD** is a synthetic coating lubricant formulated for the preservation and lubrication of wire for steel spring forming. The combination of synthetic lubricity agents, polymeric coating compounds, and corrosion inhibitors create a lubricant for sizing draws that will protect the wire for short and long term storage. Residual film will aid in payoff and forming in subsequent operations.

**BENEFITS:**

- **Effective on medium to high carbon Class I/II spring wire**
- **Excellent rust inhibiting qualities**
- **Stable in all types of water**
- **Excellent lubricity properties**
- **Exceptionally clean running**
- **Leaves less residue than typical oil based drawing rust inhibitors.**

**RECOMMENDED USES:**

1 – 3 parts **GZ-702HS** to 20 parts water

**TYPICAL SPECIFICATIONS:**

Specific Gravity – 1.03 kg/l (8.6 lbs. /gallon)

pH of a 3% solution – 8.9
