V-5BM COMPOUND

RichardsApex has specialized in custom formulating evaporating oils and solvent based lubricants for many years. This series has gained wide acceptance where minimal lubricity is required and a controlled residual film is desired. **V-5BM** is a low viscosity oil containing select friction modifiers designed to leave a light lubricating film.

BENEFITS:

- Very low viscosity
- Can be used on ferrous, nonferrous and precious metals
- Non staining contains no sulfur or chlorine
- Has good lubricating properties

RECOMMENDED USES:

- Aluminum and copper compact stranding
- Slitting both ferrous and nonferrous thin gauge strip
- Drawing and stamping light gauge parts, ferrous and non-ferrous
- Drawing ultra fine wire, nonferrous and precious metals

TYPICAL SPECIFICATIONS:

Specific Gravity	0.78
Viscosity @ 25C	3.3 cSt
Flash Point (TCC)	144F (62C)
