NAL SERIES OILS

RichardsApex NAL SERIES OILS are especially formulated for use in the drawing and stamping of ferrous, nonferrous, and alloy metals. These oils are formulated from fatty, polar lubricity agents, premium quality mineral oils, synthetic oils, and antioxidants.

BENEFITS:

- Used on ferrous, nonferrous, and alloy metals.
- Provides die protection without the use of corrosive anti-wear additives
- Produces clean, bright finishes.
- With effective filtration, this oil can have years of productive life
- Cleaned by a mild aqueous cleaner

TYPICAL SPECIFICATIONS:

<u>Product</u>	<u>Viscosity SUS @ 100°</u>	<u>Wt./Gal. Lbs.</u>
NAL-FA	185	7.32
NAL-190IBC*	85	7.48
NAL-221	40	6.80
NAL-190M CONC	220	7.56
NAL-190T	82	7.35
NAL-250H**	330	7.30

* Contains surfactant to promote ease of cleaning.

** Contains non-corrosive anti-wear additive.
