

## ADS20 COMPOUND

---

RichardsApex ADS20 is a synthetically emulsified, water-soluble lubricant recommended for use in aluminum and aluminum alloy drawing applications. ADS20 meets the industry need for a more economical and easier to control aluminum wire drawing lubricant.

### Benefits

---

High active lube content

Stable, low foaming and resistant to black oxide formation

Allows aluminum fines/oxide removal with clarifying equipment

Permits higher drawing speeds than conventional oil form products

Promotes clean machines, capstans and die throats with minimal maintenance

### Recommended Uses

---

*Aluminum Wire*

Intermediate/Multiwire

Fine Size

*Concentration Range*

8 - 15% Fat Concentration

3 - 10% Fat Concentration

### Specifications

---

Density	0.92 kg/L	7.68 lbs/gal
pH of a 3% solution	8.9
