

DL70 COMPOUND

RichardsApex DL70 is the original in a series of liquid, synthetically emulsified concentrates developed for the wet drawing of fine, low to medium grades of carbon steel wire. DL70 contains the best in extreme pressure and anti-wear additives plus a dispersing agent that makes it more tolerant to the coatings and soap powders drawn into wet solutions.

Benefits

Resistant to coating contamination

Produces clean finishes

Low consumption

Non-foaming

Long solution life

Clean machines and systems

Recommended Uses

Drawing low to medium carbon steels.

Drawing copper coated welding wire

Drawing hot dipped and electro-galvanized - lime and borax coated bright wire.

Specifications

Density	0.99 kg/L	8.25 lbs/gal
pH of a 3% solution	9.7
