

HSDLMW8EH COMPOUND

RichardsApex HSDLMW8EH is a semi-synthetic lubricant recommended for flat rolling non-ferrous strip and wire. HSDLMW8EH forms a stable, low foaming emulsion and requires little maintenance due to minimal reactivity to copper fines.

Benefits

Low lubricant consumption

Excellent lubricity properties

Exceptionally clean running and low foaming

Liquid-form, easily mixes in a broad range of water conditions

Minimal reactivity to copper fines

Recommended Uses

Flat Rolling Non-Ferrous Strip and wire: 6 - 12% concentration by volume

Specifications

Density	1.01 kg/L	8.4 lbs/gal
