

KL142M COMPOUND

RichardsApex KL142M is a concentrated synthetic lubricant with excellent detergency. It can be used at 10% by volume in water for stripping residual dry drawing lubricant in the final draw box. This is typically done by flooding the die box from a larger circulating reservoir.

Benefits

Liquid for easy mixing
Compatible with hard and soft water
Has excellent lubricating properties
Superior detergency, which promotes cleaner wire
Used on ferrous and stainless steel

Recommended Uses

As a single die skin pass for bright clean wire.
In the final draw box of a multiple draw process to remove dry drawing lubricant residue.

Specifications

Density	1.01 kg/L	8.4 lbs/gal
pH 3% Solution in DI	9.2	
Appearance	Clear, yellow liquid
