

LW32SH COMPOUND

RichardsApex LW32SH is both an oil and water soluble, pigmented, non-corrosive extreme-pressure concentrate. It is a very versatile lubricant being used for tapping, drawing, threading and other severe operations where an extreme-pressure lubricant is indicated which can be easily removed by either solvents or aqueous cleaners.

Benefits

Contains no sulfur or chlorine

Versatile lubricant for all metal types

Easily cleaned with solvents or alkaline cleaners

Can be applied by roller coating, pump or swab on the metal surface

Recommended Uses

Excellent for pilgering or as a rocker lube on stainless steel and titanium

Deep drawing copper, steel, stainless steel, aluminum and other metals

Can be used as an outside die box lube for wire drawing
