

LWX3 COMPOUND

RichardsApex LWX3 is a water emulsifiable, liquid lubricant formulated for use in the manufacturing of chain link fence that may be plastic coated, zinc plated or remain as bare metal. LWX3 is composed of polar and extreme pressure additives in a synthetic emulsification system.

Benefits

Low foaming
Excellent rust inhibiting properties
Stable in all types of water
Possesses high film strength
Fast wetting and good penetration
Inhibited against rancidity

Recommended Uses

LWX3 is recommended for use at one-part LWX3 to 3 - 15 parts water depending on the application.
