

S110 COMPOUND

RichardsApex S110 compound is a semi-synthetic, liquid-concentrate containing quality lubricity additives, emulsifiers, inhibitors, and a biocide. This operator friendly product is formulated for drawing copper rod, intermediate, and fine wire sizes, as well as plated copper wire. We are confident operating efficiencies and overall system performance will result in the best overall value.

Benefits

- Excellent lubricity properties
- Low lubricant consumption
- Exceptionally clean running
- Low foaming

Recommended Uses

	<i>Concentration Range</i>
Rod	6% - 10%
Intermediate (Multiwire)	5% - 8%
Intermediate (Single Wire)	4%- 6%
Fine	3% - 5%

Specifications

Density	0.93 kg/L	7.75 lbs/gal
pH of a 3% solution	9.5
