

## SATINKUT COMPOUND

---

RichardsApex SATINKUT is a medium viscosity, emulsifiable.

SATINKUT is a chlorinated, extreme pressure, emulsifiable oil specially formulated for severe metalworking operations that may be used "as is" or diluted with water. Emulsions of SATINKUT are extremely stable and provide superior rust protection even when used at low concentrations.

SATINKUT does not build up offensive odors on use and the emulsions last for long periods of time.

### Benefits

---

Easily emulsifiable in water

Provides excellent rust protection

Protects nonferrous metals against discoloration

Inhibited against rancidity

### Recommended Uses

---

Machining	Use 1 part of SATINKUT to 20 - 30 parts of water.
Forming, Stamping & Drawing	Use 1 part of SATINKUT to 5 - 20 parts of water.
Cutting & Grinding	Use 1 part of SATINKUT to 20 - 50 parts of water.

### Specifications

---

Density	0.97 kg/L	8.1 lbs/gal
