

SLN16

RichardsApex SLN16 is a synthetic copper wire drawing lubricant formulated for drawing copper from ultrafine through intermediate sizes. SLN16 contains quality lubricity additives, emulsifiers, and inhibitors.

Benefits

Superior detergency and stability using synthetic emulsifiers

Excellent lubricity over a wide range of finished sizes

Exceptionally clean running

Highly resistant to metals reactivity

Recommended Uses

<i>Copper and Copper Alloy Wire</i>	<i>% Brix</i>
Ultrafine	0.5 -1.5 %
Fine	1.0 - 3.0%
Intermediate Size	3.0 - 6.0%

Specifications

Density	1.01 kg/L	8.41 Lbs/gal
pH dilution of 3%	8.0
