

## SLN50

---

RichardsApex SLN50 is a synthetic wire drawing lubricant designed to draw both ferrous and non-ferrous metals from ultrafine through intermediate sizes. SLN50 contains quality lubricity additives, emulsifiers and inhibitors.

### Benefits

---

Superior detergency and stability using 100% synthetic emulsifiers.

Excellent lubricity over a wide range of finished sizes

Exceptionally clean running.

Capable of drawing most metal alloys.

Highly resistant to metal reactivity.

### Recommended Uses

---

<i>Copper and Copper Alloys</i>	<i>% Brix</i>
Ultrafine	0.5 – 1.5
Fine	1.0 – 3.0
Intermediate	3.0 – 6.0
 <i>Steel and Steel Alloys</i>	 <i>% Brix</i>
Ultrafine	0.5 – 2.0
Fine	1.5 – 4.0
Intermediate	4.0 – 8.0

### Specifications

---

Density	1.047 kg/L	8.73 Lbs/gal
pH dilution 3%	8.4
