SATIN-KUT COMPOUND

RichardsApex SATIN-KUT CPD is a medium viscosity, emulsifiable oil weighing approximately 8.1 pounds per gallon.

SATIN-KUT is a highly chlorinated, extreme pressure, emulsifiable oil specially formulated for severe metalworking operations that may be used "as is" or diluted with water.

Emulsions of **SATIN-KUT** are extremely stable and provide superior rust protection even when used at low concentrations.

SATIN-KUT does not build up offensive odors on use and the emulsions last for long periods of time.

FEATURES:

1. Easily emulsifiable in water
2. Provides excellent rust protection
3. Protects nonferrous metals against discoloration
4. Inhibited against rancidity

RECOMMENDED USES:

MACHINING - Use 1 part of **SATIN-KUT** to 20 - 30 parts of water.

STAMPING & DRAWING - Use 1 part of **SATIN-KUT** to 5 - 20 parts of water.

CUTTING & GRINDING - Use 1 part of **SATIN-KUT** to 20 - 50 parts of water.
