TD-KC2 COMPOUND

RichardsApex, TD-KC2 is a clear, light viscosity oil, formulated with special additives for good lubricity and complete burn off during the anneal of copper, aluminum, and brass tubing in straight lengths and coils. It has a high viscosity index and will adhere to metal surfaces.

BENEFITS:

R134a approved

Clean burn off during anneal

Annealed metal will be clean and bright

RECOMMENDED USES:

Use on blocks and draw benches "as supplied" for drawing and rolling copper, aluminum and brass – tubes, bars and shapes; primarily used as an I.D. lubricant.

TYPICAL SPECIFICATIONS:

Chlorine	Nil
Sulfur	Nil
Specific Gravity	0.86
Viscosity @ 100°F	200 SUS

The components in this product, and the product by trade name, have been approved for R-134a refrigerant compatibility applications.
